EVS

Evaluation by Vote System

Evaluation:

A evaluator is chosen on random, to have a opportunity to propose a change to be made on primary.

The chosen evaluator can make a change or not, if not, the next evaluator will be chosen at random.

After that, the other evaluators are activated to vote on if the change from the chosen evaluator should be committed to primary.

After the vote is successful or not, the next evaluator is chosen on random, to propose a change.
